This eLearning course will explore the rates of VBAC, aspects of uterine rupture and how to support a woman who is planning a VBAC.

CPD: This course has been endorsed by the ACM for 1.5 CPD hours which is equivalent to the course duration.

Course Access: All users are provided with 12 months access from the date of their enrolment.

Learning Objectives:

- To understand the different global and Australian VBAC rates
- To understand the occurrence and signs of uterine rupture
- To understand the impact of the four factors that influence how a woman feels after her planned VBAC
